

RAJARAM S

Workday HCM Associate Consultant | HRMS Application Support Analyst

Chennai, India • +91-9488120199 • raja2513ra@gmail.com • [linkedin.com/in/rajaram13](https://www.linkedin.com/in/rajaram13) • [rajaram0313.github.io](https://github.com/rajaram0313)

PROFESSIONAL SUMMARY

HRMS professional with 4 years 5 months of hands-on application support experience covering Payroll, Attendance, Leave Management, and Employee Lifecycle in a multi-client environment. Completed an industry-focused Workday HCM Techno-Functional training program (April–May 2026) with extensive hands-on practice in a live Workday tenant across Core HCM, Business Process Framework, Compensation, Security, Recruiting, Report Writing, Calculated Fields, and EIB Integrations. Actively seeking an Associate Workday HCM Consultant or Workday HCM Support Analyst role to apply strong domain expertise and Workday skills in a real implementation or support environment.

SKILLS

Core HCM	Supervisory Orgs & Hierarchies · Organization Structure (Company, Cost Centre, Location Hierarchies) · Staffing Models (Headcount / Position / Job) · Position Management · Job Profiles & Families · Org Assignments · Hire · Termination · Job Change · Pre-Hire · Worker Lifecycle
Recruiting	Job Requisition · Job Posting (GMS) · Candidate Lifecycle: Application → Screening → Assessment → Interview → Offer → Ready-to-Hire
Compensation	Compensation Grades & Grade Profiles · Compensation Plans & Packages · Eligibility Rules · Compensation Elements · Propose Compensation on Hire · Compensation Change BP
Security	Role-Based Security Groups (Constrained & Unconstrained) · User-Based Security Groups · Domain Security Policies · BP Security Policies · Activate Pending Security Policy
Business Processes	BP Framework & Definitions (Hire, Terminate, Job Change, Compensation Change) · Condition Rules & Routing · Approval Chains · Notifications
Report Writing	Simple · Advanced · Matrix · Trending · Transposed · Composite Reports · Filters & Sub-Filters · Prompt Configuration
Calculated Fields	Evaluate Expression · Extract Single/Multiple Instance · Lookup Related Value · True/False Condition · Date Difference · Concatenate Text
Integrations	EIB Inbound (Create Position, Spreadsheet Upload) · EIB Outbound (Advanced Report Extract) · Core Connector Worker (CCW) · PICO · PEI
Conceptual	Time Off & Absence · Time Tracking · Workday Payroll · Workday Studio
Application Support	L1/L2 Support · Incident Management · Root Cause Analysis (RCA) · SLA Management · Functional Testing · Escalation Management · Biometric Integration · Multi-Client HRMS Support · Client Communication

PROFESSIONAL EXPERIENCE

Technical Support Engineer – HRMS Application (L1/L2) | *Clocktos Infotech, Chennai Nov 2021 – Mar 2026*

Palgeo HR Software is a modern cloud-based HRMS platform serving Indian SMEs in a multi-client support model — covering Payroll, Attendance, Leave, and Employee Records.

Attendance Management

- Configured end-to-end Attendance module for new clients: gathered requirements, created Organization Profiles, set up Institutes, Shifts, Geofence Locations, and Biometric device integrations.
- Imported and managed employee data via bulk Excel upload; configured holiday calendars, timesheet rules (permissions, grace time), and location-based shift assignments.
- Implemented biometric hardware integration: installed Bio Service on client servers via RDP, validated network connectivity between devices and the HRMS, and ensured real-time attendance synchronisation through API calls.
- Diagnosed and resolved attendance synchronisation failures by analysing Bio Service logs, identifying network/configuration root causes (e.g., device unreachable errors), and restoring data integrity across employee timesheets.
- Handled geofence-related mobile check-in issues: analysed configuration vs. connectivity vs. backend (face recognition service expiry) root causes and escalated backend issues to the development team with follow-through to resolution.

Leave Management

- Configured Leave module: set periodic types, created leave types with eligibility/condition rules, performed bulk employee leave balance imports, and set up multi-level approver hierarchies.
- Extended same configuration to OD, Permissions, Missed Punch, Backdated Attendance, and Offline Attendance workflows.
- Resolved leave balance mismatches, incorrect approver routing, and wrongly configured eligibility rules through root cause analysis and functional testing prior to production fixes.

Payroll Management

- Configured Payroll module for clients: gathered period schedule requirements, configured earnings (Allowances: HRA, DA, TA) and deductions (EPF, ESI, Professional Tax) in master data; performed bulk payroll data imports via Excel templates.
- Managed integrated payroll processing where attendance and leave data automatically fed into payroll calculations for payslip and pay process report generation.
- Diagnosed and resolved critical payroll miscalculations by analysing salary components, earning/deduction rules, and system-level configurations, restoring payroll accuracy within SLA.

Application Support & Incident Management

- Managed full incident lifecycle — identification → prioritisation → tracking → resolution → closure — using structured ticketing workflows; achieved ~95% SLA adherence across 100+ client incidents.
- Supported complete employee lifecycle processes: onboarding, transfers, promotions, offboarding, and mobile app issues (check-in/checkout, leave apply & approval).
- Introduced structured troubleshooting checklists and RCA documentation templates, measurably reducing repeat incident frequency across the support team.
- Collaborated with development teams on bug fixes, escalations, and preventive corrective actions; conducted functional testing and validation of all fixes prior to production deployment.
- Interacted with clients daily via email, chat, and meets; delivered full Palgeo HR Software product demos to prospective clients.
- Generated custom reports based on client needs and provided day-to-day query resolution across all modules.

Graduate Engineer Apprentice – Quality Control | *Avalon Technologies Pvt Ltd, Chennai Jan 2020 – Jun 2021*

- Monitored production processes for quality compliance; inspected materials and electrical systems for defects.
- Prepared defect analysis reports and root cause documentation; collaborated cross-functionally to implement corrective actions.

WORKDAY HCM TRAINING & TENANT PRACTICE

Workday HCM Techno-Functional Training

Apr 2026 – May 2026

Uptaught Edtech Institute | All skills acquired through structured training and hands-on practice in a sandbox/training tenant.

- Core HCM: Configured Supervisory Org hierarchies, Organisation Structure (Company, Cost Center, Location Hierarchies), Staffing Models, Positions, Job Profiles, Job Families; performed full Hire-to-Terminate lifecycle including Pre-Hire and Job Requisition workflows.
- Compensation: Created Compensation Grades, Grade Profiles, Plans, Packages, and Eligibility Rules; assigned Compensation Elements and practised Propose Compensation on Hire and Compensation Change BP.
- Business Processes: Configured BP definitions for Hire, Terminate, Job Change, and Compensation Change; set up approval conditions, routing rules, and notifications.
- Security: Created and assigned Role-Based (Constrained & Unconstrained) and User-Based Security Groups; configured Domain and Business Process Security Policies; activated pending security policies.
- Report Writing & Calculated Fields: Built Simple, Advanced, Matrix, Trending, Transposed, and Composite reports; practised Evaluate Expression, Lookup Related Value, Date Difference, True/False, and Field Definitions.
- Integrations: Configured EIB Inbound (Create Position, spreadsheet upload), EIB Outbound (Advanced Report extract), Core Connector Worker (CCW), PICO, and PEI end-to-end in tenant.

KEY ACHIEVEMENTS

- Resolved payroll miscalculation issues impacting multiple clients through in-depth analysis of salary components, earning/deduction rules, and system configurations — restoring accuracy within SLA every time.
- Diagnosed and eliminated recurring attendance synchronisation failures by correcting data integrity issues across employee timesheets and HRMS records for multiple clients.
- Introduced structured troubleshooting checklists and RCA documentation templates, reducing repeat incident frequency across the support team.
- Maintained ~95% SLA compliance while handling 100+ incidents, demonstrating consistent high performance in a client-facing multi-client support environment.
- Delivered end-to-end Workday tenant configuration across Core HCM, Compensation, Security, Business Processes, Report Writing, Calculated Fields, and EIB Integrations during training.

CERTIFICATIONS & LEARNING

- Workday HCM Techno-Functional Training — Completed, Uptaught Edtech Institute (May 2026)
- Workday Pro HCM Certification — Planned (Target: 2026)
